Future Focus Infotech is the
authorized Consulting Partner
for Alyne

73%

of Leaders reported their biggest concern in 2020 was from Increased Organizational Complexity and Heightened Stakes in Managing and Protecting Data

Are You This Leader?

In 2020...

25%

Of the total cyber attacks that have gone down, 25% involved phishing

41%

of customers would stop buying from a business victim of a ransomware attack

75%

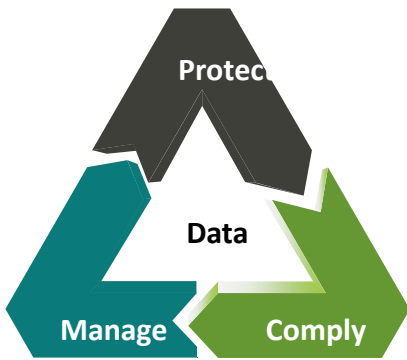

of cyberattacks start with an email

67%

of data breaches resulted from credential theft, human error or social attacks

"It is not enough to just put in expensive hardware or layers of security tools - An effective governance program can go a long way in nullifying different attack vectors"

USE CASES

- Vendor Management
- IT Risk Management
- Policy Management
- Regulatory Implementation
- Infosec Management (ISMS)

- 24% more in an on prem solution
- 41% more on a spreadsheet solution

Average ransomware payment rose

33%

to \$100,000

alyne's Insurance Success Snippets

GERMAN INSURANCE GROUP

Alyne started by supporting Cyber Risk Management processes in line with new regulations. Further departments were engaged and Alyne's capabilities were then leveraged for business impact assessments across hundreds of business processes, modelling asset relationships, performing privacy impact assessments for the DPO and preparing vendor assessments for data processors.

INTERNATIONAL INSURANCE GROUP - VENDOR

This insurance group leverages Alyne's highly scalable assessment capability to build a vendor assessment capability. Outcomes of the vendor assessments are displayed in the context of relevant regulatory requirements and common security frameworks.

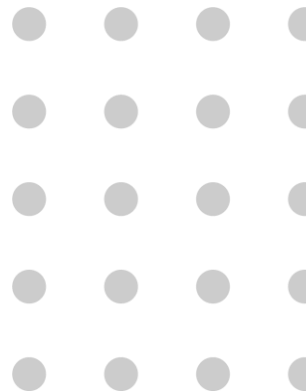

EUROPEAN INSURANCE GROUP

The Chief Risk Officer has decided to leverage Alyne as the central platform for managing operational risk across more than 500 departments and subsidiaries of the international insurance group. This covers processes from risk identification, risk review, risk mitigation and risk approval. The current risk exposure per entity is always available for risk stakeholders and collaboration across the group is enhanced.

GOVERNMENT INSURANCE

This government insurance organisation in Asia Pacific is leveraging Alyne to manage their own Cyber Security obligations and evaluating their customers' Cyber Risk exposure in the context of Cyber Insurance. Alyne's library linking both the NIST C2M2, COBIT and ISO standards to federal and state legislation enabled senior stakeholders to get a quick and transparent view of their portfolio's risk.
